GENIVI Document IAmControlPlugin

Platform Compliance Specification

Version 2.0

Status: Published

Sponsored by:

GENIVI Alliance

Accepted for release by:

This document has not yet been accepted for release by the GENIVI Alliance Board of Directors.

Abstract:

This document is the GENIVI platform compliance specification.

Keywords: GENIVI

1 Introduction

This document describes general requirements on the platform, all external standards and all the components of the GENIVI platform release.

2 Change History

The following table shows the change history for this specification:

Date	Version	Author, Comment
6.12.11	1.0	Initial version, C Müller, BMW
2.3.12	1.1	Update for release
31.1.13	2.0	Update for foton release

3 Targeted Audience

Anyone wishing to apply for compliance should have this document at hand, as it complements the *GENIVI Platform Compliance Statement* document.

4 Categories

The compliance requirements within the GENIVI compliance program fall into the following general categories:

- ***Standards***

The Standards list the compliance requirements that refer to standards external to GENIVI

- ***Components from GENIVI component list***, that can be of the following compliance levels:
 - ***PlaceholderComponent***, as described in GENIVI Compliance Explanation
 - ***AbstractComponent***, as described in GENIVI Compliance Explanation
 - ***SpecificComponent***, as described in GENIVI Compliance Explanation

5 Abbreviations

In further text the following abbreviations (ABB) will be used for forming the IDs:

- ST for Standards
- PC for PlaceholderComponent
- AC for AbstractComponent
- SC for SpecificComponent

6 Format of the entries in this document

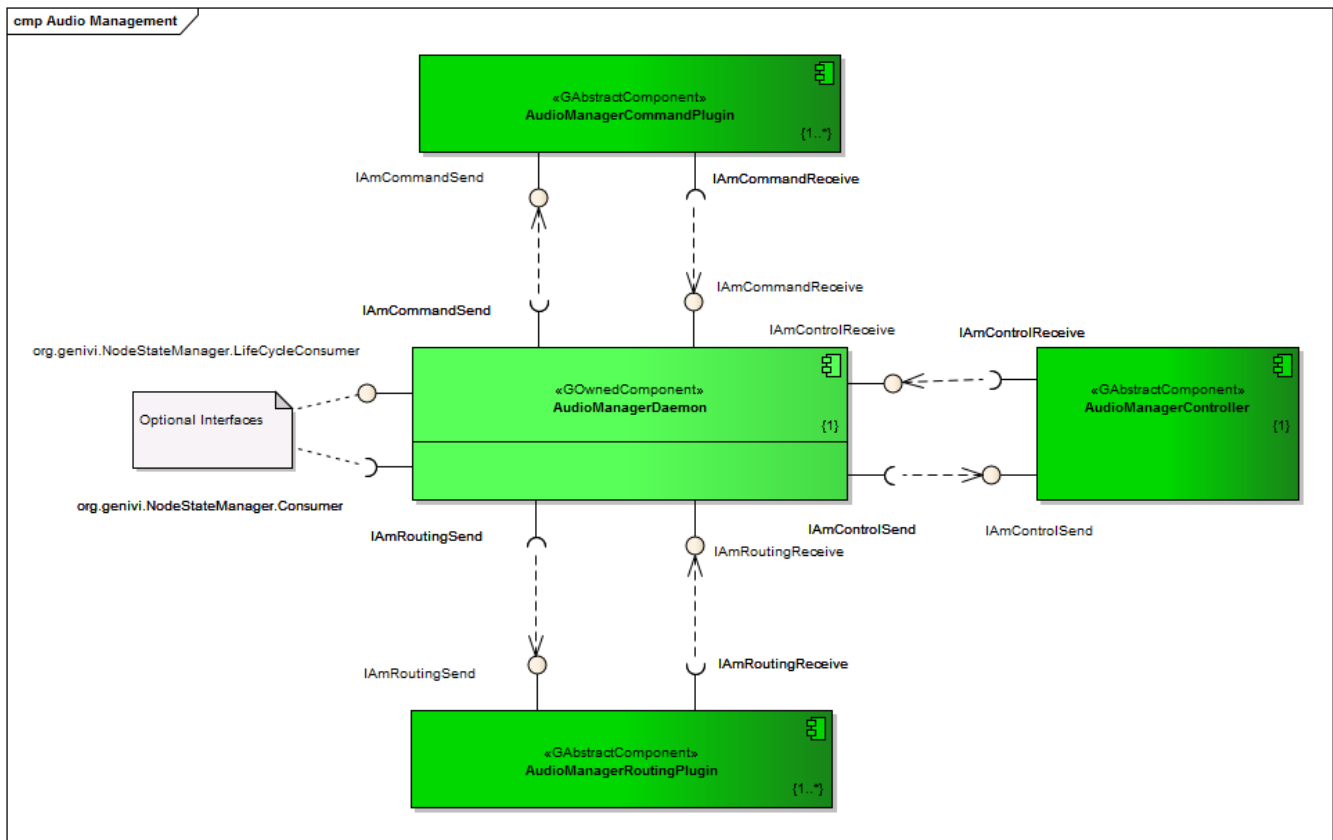

The entries pertaining to components have the following format:

<i>Field</i>	<i>Description</i>
ID	unique ID, text formed as: <ABB>-<auto incrementing number>.<sub code>
Name	name with optional link (URL) to the external reference (e.g. The project home page)
Compliance Level	as defined in <i>Categories</i> .
Priority	as described in GENIVI Compliance Explanation
Implementation constraints	Contains the version(s) allowed May contain compile and runtime configurations
Description	textual clarification
Requirements	For PC, AC contains a table of requirements

7 Standards

GENIVI Compliance Release 1.0 does not require references to external standards.

8 Component Overview

9 Component Interaction

9.1 Toolbox

Type: **Package**
Status: Reworked. Version 1.0. Phase 1.0.
Package: Control Interface
Detail: Created on 24.08.2011. Last modified on 10.10.2011
GUID: {381F5748-B9F8-4e8a-B955-62222423FA69}

This packet holds all actions that can be used by the controller. These tasks are at disposal for the AudioManagerController to fulfill his tasks.

tool_AsyncSetSinkNotificationConfiguration

Type: **Package**
Status: Proposed. Version 1.0. Phase 1.0.

The adjustments for the speed are product specific in the controller. Here is shown how the AudioManagerDaemon provides speed information with a given quantization and sample rate.

Turning speed controlled volume on/off and possible settings are achieved via SinkSoundProperty settings.

 * This interface gives access to all important functions of the audiomanager that are used by
the AudioManagerController
 * to control the system.
 * There are two rules that have to be kept in mind when implementing against this interface:\n
 * \warning
 * 1. CALLS TO THIS INTERFACE ARE NOT THREAD SAFE !!!! \n
 * 2. YOU MAY NOT CALL THE CALLING INTERFACE DURING AN SYNCHRONOUS OR ASYNCHRONOUS CALL THAT
EXPECTS A RETURN VALUE.\n
 * \details
 * Violation these rules may lead to unexpected behavior! Nevertheless you can implement thread
safe by using the deferred-
 * call pattern described on the wiki which also helps to implement calls that are forbidden.\n
 * For more information, please check CAmSerializer
